

SPS - MECHANICAL SEALS

We offer a wide range of cartridge & components seals.

GENERAL PURPOSE SINGLE CARTRIDGE MECHANICAL SEALS

- Cast Gland Single Seal
- ANSI Cast Gland Single Seal
- ANSI Large Bore Single Seal
- Fully machined gland single cartridge seal with quench option
- ANSI Machined Gland Single Seal
- Small bore single cartridge seal
- Rubber bellows single cartridge seal
- Single spring single cartridge seal - axial movement
- Robust single spring single cartridge seal
- Heavy duty single cartridge seal
- Single spring rubber bellows cartridge seal

GENERAL PURPOSE DOUBLE CARTRIDGE MECHANICAL SEALS

- Stationary design double cartridge seal
- Bi-metal double cartridge seal
- ANSI Machined Gland Double Seal
- Double cartridge seal with bi-directional pumping scroll
- Larger bore double cartridge seal with bi-directional pumping scroll
- Tandem design double cartridge seal

SINGLE & DOUBLE CARTRIDGE SLURRY MECHANICAL SEALS

- Plate spring with protected o-ring single seal
- Double cartridge seal, reverse pressure balanced with narrow faces
- Rubberized disc spring, rotary design single seal

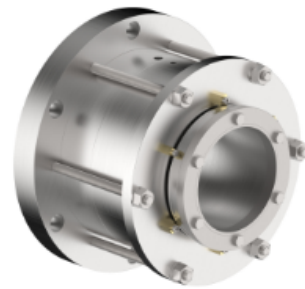

SINGLE & DOUBLE CARTRIDGE SEALS DESIGNED IN ACCORDANCE WITH API 682 STANDARDS

- API Legacy Pump Single Seal
- API Legacy Pump Double Seal
- Innovative Technology Single API Cartridge Seal
- Innovative Technology Dual API Cartridge Seal
- Innovative Short Length Dual API Cartridge Seal
- Single High Pressure API Seal
- Dual High Pressure API Seal
- Single Stationary Metal Bellows API Seal
- Dual Stationary Metal Bellows API Seal
- Single Metal Bellows API Seal
- Dual Metal Bellows API Seal

CARTRIDGE SEALS FOR APPLICATIONS WITH RADIAL AND AXIAL MOVEMENT REQUIREMENTS

- Stationary design double cartridge seal
- Bi-metal double cartridge seal
- ANSI Machined Gland Double Seal
- Double cartridge seal with bi-directional pumping scroll
- Larger bore double cartridge seal with bi-directional pumping scroll
- Tandem design double cartridge seal

MECHANICAL SEALS FOR FLYGT & GRINDEX SUBMERSIBLE PUMPS

COMPONENT SEALS

- MULTIPLE SPRING
- WAVE SPRING
- RUBBER BELLOWS

- STATIONARY SEAT
- SINGLE SPRING
- OTHER BELLOWS

Among the solutions we engineer together, are:

- Tailor-made designs with technical benefits to satisfy a specific need.
- Our existing product range does not have a full stop at the end, our team will design a solution that is application specific.
- Technical on site support from the manufacturer directly.
- Delivery immediacy, which is a need that also requires an engineered solution.
- Our focused commitment to establishing the industry's broadest in-stock inventory of mechanical seals and gland packing has successfully satisfied a remarkably diverse base of Business Partners.
- Value for money, as over-priced sealing devices are not tolerated in the modern age.
- Price will never be the problem.
