OUR COMPANY

SPS is a South African pump and associated equipment supply company that specialises in the design and consulting, sales, manufacturing, and installation of proper engineered pumping solutions in the Mining, minerals processing, water treatment and water transfer related industries.

MISSION AND VISION

Slurry Pump Services Africa mission is to establish the company as a proffered supplier of pumps and associated equipment that is underpinned by the following:

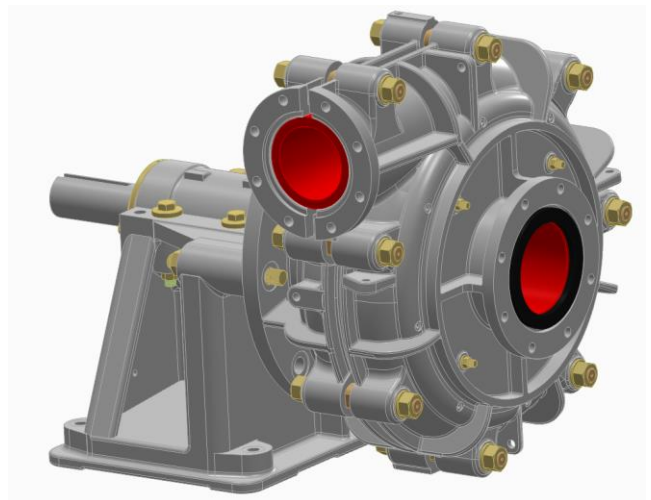

- Customer focus
- Reliability of equipment
- Low cost pumping
- Improving ownership cost

PRODUCTS AND SERVICE

Slurry Pump Services Africa strives to design and manufacture pumping systems with the lowest possible ownership cost that is technically advanced for the applications.

Our product range and services includes:

- Slurry pumps and spares
- Water pumps and spares
- Peristaltic pumps and spares
- Piping and fittings fabrication
- Equipment installation
- Engineering and consulting
- Fault finding and reporting
- Equipment supply that relates to pump systems

SLURRY PUMPS AND SPARES

SPS supply slurry pumps for all applications in the mining process designed to the highest industry standards set over the years.

Our horizontal slurry pumps are available in the ultra heavy duty as well as the medium duty designs for applications varying from the harsh mill discharge to the less abrasive flotation applications. We supply both the soft rubber lined as well as the hard metal chrome alloys internals in the full range of slurry pumps.

The seal type will be dependent on the application e.g. gland water or expeller seal.

The equipment offered by our company are compatible replacement items designed to fit our and other brands of slurry pumps.

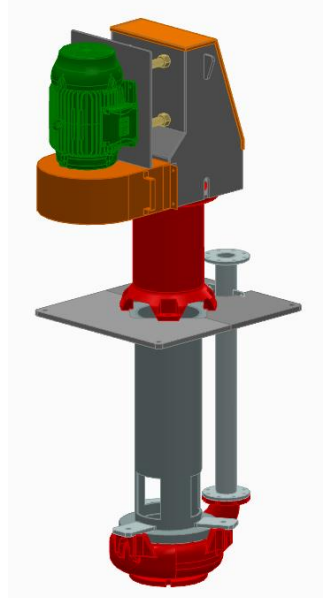

VERTICAL SPINDLE PUMPS

SPSA also supply the vertical spindle slurry pumps and spare parts for the industries that we serve.

We can manufacture the pump wet end parts in various materials specifically designed for the typical spillages handled in the industry. Different materials could be confirmed.

The pump lengths vary between 900 and 2100 mm depending on the application and pump speed limitations.

WATER PUMPS AND SPARES

Slurry Pump Services Africa represent various clear water pump manufacturers.

We supply pumps in general water transfer applications using end suction and horizontal split case pumps

SPS further specialise in gland water system design, supply and installation. To date we have been involved in a number of gland water systems using multi stage pumps.

Typical designs include the main feed header been pressurised with flow and control equipment to ensure water at the correct flow and pressure to each gland. Alternatively we allow for take-offs on the different pump stages for the correct pressures.

PUMP REFURBISHMENT

Our workshop is repairing and refurbishing pumps and bearing assemblies daily making sure that service exchange units are readily available, ensuring minimal down time on site. Onsite maintenance contracts are available.

Before

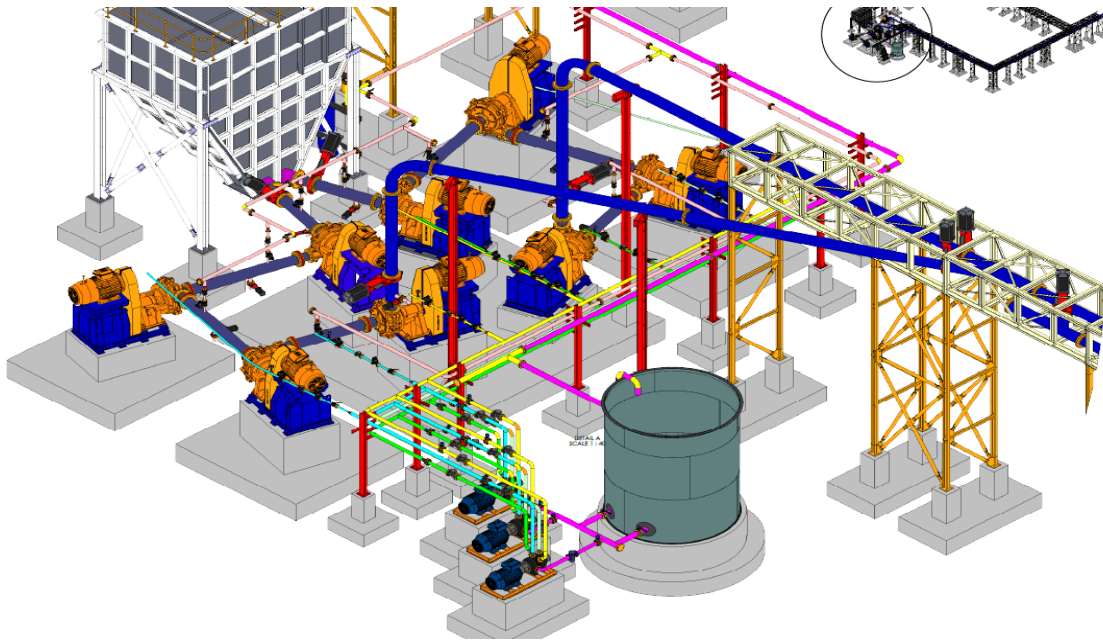

After

EQUIPMENT INSTALLATION

Slurry Pump Services does turnkey projects. Pump station design, drawings, manufacturing & fabrication, supply, and installation of the entire project.

EQUIPMENT SUPPLY

Slurry Pump Services are representing many OEM pump brands in the area. We are authorised resellers of the following equipment:

- Slurry pumps, rubber or metal lined & motors
- Vertical spindle spillage pumps & motors
- High head dirty water pumps & motors
- Blowers
- Clear water pumps & motors
- Submersible dewatering pumps
- Emergency diesel / electric driven dewatering pumps
- Pump spare parts
- Peristaltic pumps with gearboxes & motors
- Steel fabrications e.g. pump bases & guards
- Steel piping and fittings
- HDPE piping and fittings
- Rubber hoses
- Anti vibration bellows
- Fasteners and gaskets
- Wedge belt drive sets & couplings / gearboxes
- Valves
- Orifices

ENGINEERING & CONSULTING

At Slurry Pump Services we have many years of experience in pump system design and problem solving investigations. We specialise in the following fields:

- Slurry pump system designs and selecting suitable equipment. We specialise in high wearing applications such as mill discharge, frothy slurry, high-pressure tailings disposal & booster pump stations.
- Slurry Pumps Plant audit
- Gland water system design for slurry process plants
- Pump wear problem investigations and recommendations
- System problem solving investigations such as settling velocity problems and corrective action reports.
- Project management on pumping projects

EXPORTS

SPS exports a wide range of slurry and clear water pumps & spare parts to the DRC, Zambia, Guinea, Sierra Leone, Angola and Senegal.

PUMP RENTALS

Our extensive rental fleet comprises submersible drainage and dewatering pumps, slurry and sludge pumps, diesel driven pumps, dredging system, flotation devices and accessories. All pump rental solutions available from SPSA are ISO 9001 certified.
